

6 WAYS TO GET PAID FAST

Transform Your Payment Experience

Your Guide To Go Digital

plastiQ

A woman with long, wavy reddish-brown hair is smiling and looking off to the side. She is wearing a light blue and white vertically striped blazer over a light blue top. She is standing in what appears to be a restaurant or cafe, with stacks of white plates and bowls visible in the foreground and blurred figures of other people in the background.

Cut costs.
Save time.
Get paid
faster.

It's time you knew more about accepting payments digitally.

Getting paid fast just got easier.

It's a rapidly changing world and more and more businesses are using online payments to quickly adapt.

And why wouldn't they? Online payments provide a safe, seamless experience at a time when every customer is looking for just that.

There's a powerful payment solution that lets you get paid fast and improve your customer's experience: the payment link.

What's a payment link? And how do you start using this compelling technology to up the game of how you get paid? Let us walk you through it.

Wait, what's a payment link?

Good Question.

A payment link is a customized URL you can easily copy and paste into emails, websites or invoices. Your customers click a payment link, they're taken to your unique landing page, then pay you quickly and conveniently. Meaning: even if you don't have a website, with a payment link you can still get paid online.

It's as simple as it sounds. And it gets better.

Stay flexible. Stay secure.

Using a payment link gives you the flexibility to work within whatever invoicing systems you're already using. There's no confusing integration or set-up; you just drop the link and start getting paid fast.

And because payment links are powered by established payment providers, you and your customers get to rest easy knowing that your payments are entirely secure.

We've covered the basics, let's talk about specific ways to get paid with payment links and beyond.

TIP:

In-the-know payment providers will have predesigned sharing tools—like Pay Now buttons, QR codes, etc.—on hand to help you get started, getting paid faster.

WAYS TO GET PAID #1:

Upgrade your invoice

If you're using invoices and waiting for payments, you're waiting too long to get paid. Payment links offer a way to stop waiting and start getting paid in real time. Business who send invoices and wait on checks report:

46

average
days¹ to
receive
payment.

93%

of all B2B
payments
reported
late.²

80%

of B2B
payments
take 20+ days
to arrive.

7%

of those
payments
fail.

Invoices aren't going anywhere, so you need to upgrade them.

By adding payment links to your invoices, you don't wait to get paid. You simply copy-and-paste the link into your existing invoice template (snail mail or digital—it doesn't matter) and your customers now have the opportunity to pay you fast with a credit card just by clicking the link or entering the URL.

WAYS TO GET PAID #2:

Use your website as a payment tool (it's easy, we promise)

Using your website to accept payments seems like it requires a lot of technical know how. It doesn't have to.

Pay Now buttons come pre-designed to include your customized payment link, so adding one to your website—and all the benefits that go along with it—is as easy as copy and pasting a single line of code.

A single line of code and you'll be able to save time, reduce damaging clerical errors, and get paid quicker so you'll have more cash on hand when you absolutely need it. 24 hours a day, 7 days a week—just point your customers towards the shiny new Pay Now button on your website.

POWERED BY **plastic**

A man with light brown hair and glasses, wearing a white button-down shirt, is looking down at a computer monitor. His right hand is pressed against his forehead, suggesting frustration or stress. The background is a blurred office environment with windows and other computer monitors.

77%

of B2B buyers say
their last purchase
was complex or
difficult.⁵

An improved checkout experience

Simply put: checkout processes on websites can be complicated and this complication can have a major effect on a sizable number of your customers.

80%

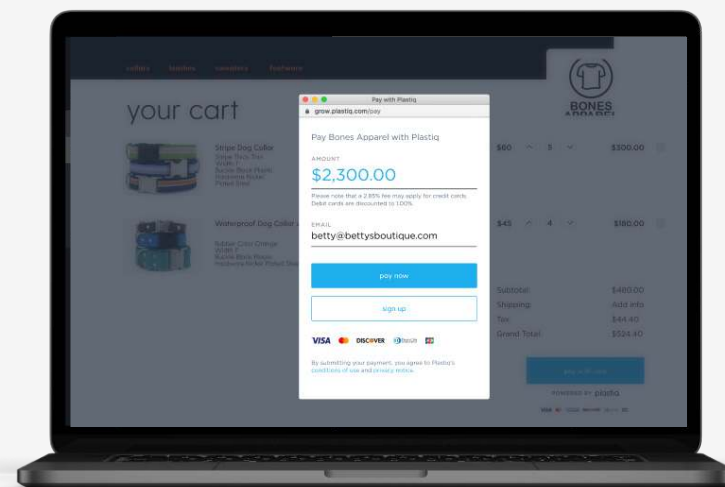

B2B buyers purchase online.⁶

57%

B2B buyers abandon their carts due to long checkout processes.⁷

This is where Checkout SDKs come in.

With Checkout SDK, you only need to copy a single line of code into your site editor to start integrating payments within your existing checkout process. This enables a new way for you to seamlessly accept credit cards and cut out entire steps from the buying process. Speeding up the experience for your customers will help to eliminate cart abandonment. Now, customers lock in their orders immediately, transactions are completed quickly, and you and your customers are much, much happier.

TIP:

Customers who pay within the buying process abandon carts less frequently.

A woman with long dark hair is smiling and holding a black smartphone in her right hand and a white coffee cup in her left hand. The background is blurred, showing what appears to be an outdoor setting with a railing. Large green and yellow text is overlaid on the image.

BILLION

people used QR codes
to pay in 2020.

By 2025, its
projected that

30%

of all mobile
users will pay
with QR Codes.⁸

WAYS TO GET PAID #4:

The simple QR code

Global circumstances over the last three years (i.e. pandemic) have increased the need for contact-free payment. The QR code (the beefed up barcode you see to your right) fits the bill.

QR codes provide a touch free payment solution that requires nothing—no special payment terminals in any way, shape or form—from your customer aside from ownership of a smartphone. They are simple and safe for your customers and you can easily add them to invoice templates, shipping labels or just hang them on the wall of your office. All your customers need to do is scan them to get you paid immediately.

In-person, on-premise, on-the-fly transactions have never been easier.

TIP:

Custom QR codes are easily downloadable and have your payment link already built in.

WAYS TO GET PAID #5:

Virtual terminals

Understandably, not all of your customers are tech-savvy millennials born with a smartphone glued to their hands. No worries. A good payment provider can offer you a Virtual Terminal a no-tech payment option that allows you to accept and record credit card payments through your computer or mobile device. It works perfectly for remote billing or taking payments directly from your customers.

It doesn't matter if your customers gave up on technology with the advent of color television, getting paid via a Virtual Terminal is simple for everyone.

WAYS TO GET PAID #6:

Recurring payments

Subscriptions—or recurring or scheduled payments—take the pain out of payment requests by automatically getting you paid on a schedule. This becomes even easier when a payment provider deals with the details of the digital payment. Allowing you to save time and money while they manage compliance and everything else that goes into the subscription billing process. Leaving you free to focus on building your business better.

Overwhelmed? We can help.

With payment links, QR codes, Pay Now buttons and everything in between—there's a lot of ways to use payment links to help get paid fast. So many ways you could get overwhelmed without the guidance of a relied upon expert in the digital payment field. We'd like to introduce you to one.

Hi. We're PlastiQ.

We're dedicated to creating a simple, effective, easy-to-use, all-in-one payment processing tool for businesses like yours to get paid better. If you have questions (and we're pretty sure you have questions) we'd love to help answer them. Mainly though, we'd love to start helping you get paid faster and easier. It's what we do.
