

Embed payment options into your platform with PlastiQ Connect APIs

## Easily embed new payment choices for your customers.

Now you can give your SMB customers the option to use their current credit cards—even when cards aren't accepted. This means faster payments and more cash flow control for them, and new revenue for you.

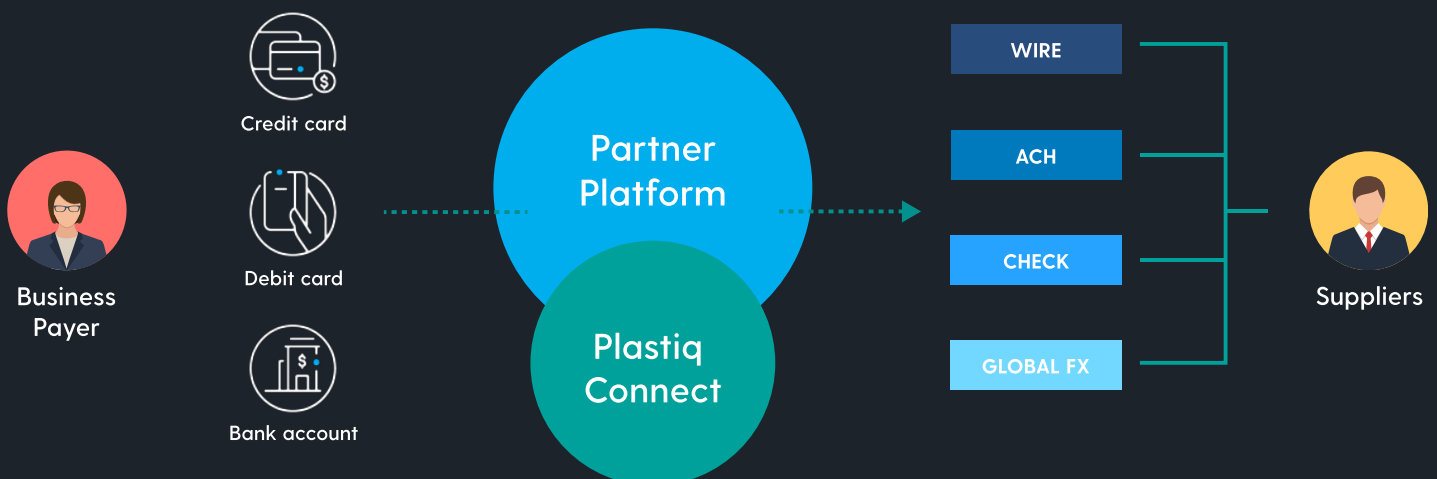

### Benefits for partners

- ✓ Quickly add payment execution into your SMB platform or enhance your existing capabilities with card-to-account payments.
- ✓ Add 100% additional volume by enabling SMB card payments where cards aren't accepted.
- ✓ Deepen engagement with SMB customers without the hassle of risk management, compliance and card payment operations.

### Benefits for SMBs

- ✓ Pay suppliers by card, even where they aren't accepted, and overseas by card in more than 45 countries/22 local currencies.
- ✓ Improve cash flow by extending the time needed to pay high volume bills.
- ✓ Pay invoices the way you want—by credit card, debit card or bank account—regardless of how your suppliers want to get paid.

Embed payment capabilities, or enhance current functionality

88%

of business suppliers still don't accept credit cards, forcing SMBs to use limited cash on hand.

32%

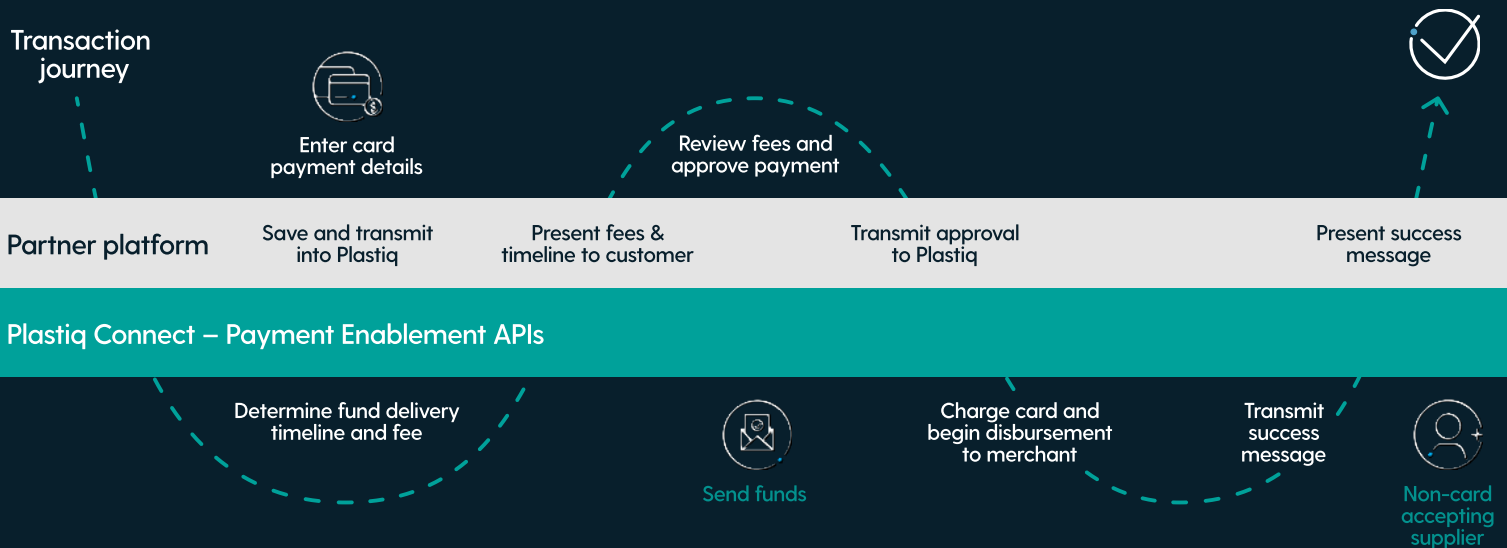

increase in the market size for embedded payments since 2019

100%

incremental card-to-account payment volume

## How it works: from card to account

Your customer wants to pay a non-card accepting vendor with a credit card

## The PlastiQ Connect API Suite Includes:

- Robust set of Payments REST APIs and embeddable UI widget for payment method tokenization
- Comprehensive, machine learning-based risk/fraud/compliance engine
- Industry leading vendor directory
- Bank grade security; PCI Level 1 compliant
